

aream Group SE continues on growth course: René Kautz joins management team

Düsseldorf, 10 February 2026 – aream Group SE is growing rapidly and is expanding its management structure accordingly: René Kautz, previously Managing Director at aream GmbH, is joining the company's management with immediate effect and has been appointed Managing Director and Chief Commercial Officer (CCO) of aream Group SE. This move enables the aream Group to take advantage of new market opportunities and further advance its position as a leading project developer and asset manager with a focus on sustainable infrastructure.

In addition to René Kautz as CCO, the management team includes Markus W. Voigt as Executive Chairman and Patrick Lemcke-Braselmann as Co-CEO. In addition to the Energy Markets division, Kautz will be responsible for Retail Sales, Human Resources and Joint Venture Management. The strategic orientation of the aream Group will remain unchanged. Rather, the new management structure serves to clarify the distribution of tasks and strengthen operational implementation along the three central pillars of the Group: Operations and Asset Management, Project Development and Energy Markets.

"The growth of the aream Group requires clear structures", says Executive Chairman Markus W. Voigt. "With René Kautz, we are bringing a proven expert into the management of the holding company who will play a decisive role in driving our expansion on both the project and investor sides. His experience in solar and wind energy and in dealing with institutional clients is a key component of this." Kautz has been with aream since 2021 and previously worked for Hamburg Commercial Bank (formerly HSH Nordbank AG) in the renewable energies sector in Germany and abroad.

René Kautz: "The combination of a growing project pipeline, innovative investment solutions and increasing investment demand for sustainable infrastructure opens up great development opportunities. I look forward to actively shaping this growth in the management team and achieving new goals together."

About aream Group SE

Founded in 2005, aream Group is a developer and asset manager focusing on sustainable infrastructure in the renewable energy sector. This includes wind and solar power, grids and storage technology. With its operations and asset management, project development and energy markets divisions, aream Group covers the entire value chain for renewable energy investments. With a transaction volume of more than €2.5 billion, aream is one of the leading asset managers in this market, generating around €40 million per year in green electricity from its own portfolio of investments. Since 2008, aream has produced more than 4 billion kWh of green electricity. As part of its growth strategy, several solar and wind farms as well as battery storage facilities are to be realised or acquired in the coming years. Thanks to its own project development within Aream Advisory GmbH, the group currently has a development pipeline in Germany with great potential. Further information: www.aream.de.
